CARE FOR WORK ENVIRONMENTS®

zero in™ WHAM!

TOTAL RELEASE INSECT KILLER

SIMPLE, ONE-STEP ACTION

Takes immediate action against insects. Zero In Wham provides a hands-off method for killing both crawling and flying insects (both adult and larvae) on contact. Simply activate a can in an empty room and leave. Zero In Wham limits the exposure of the product to the user, making it safer than manual spray operations.

NEW ULV FOGGING SYSTEM

Zero In Wham's ULV Fogging System kills bugs on contact. ULV (Ultra Low Volume) means that the visible blanket of dry fog consisting of microscopic particles is able to attack insects where they hide-behind baseboards, in openings around pipes, around door and window frames.

DRY ACTION INSECTICIDE

Dry-spray Zero In Wham does away with messy residues that attract dirt and dust. The formula won't leave a sticky, oily coating that is sprayed out with wet spray insecticides. Used properly, Zero In Wham will not damage most valuable furniture, carpeting, draperies and hard surfaces.

ECONOMICAL VERSATILITY

One highly-concentrated, 6 ounce can is all you need to treat an area measuring 4,000 cubic feet (20'X25'X8'). Kills ants, cockroaches, crickets, fleas, flies, mosquitoes, rice weevils, saw-toothed grain beetles, small flying moths and ticks.

COMPLETE INSECT CONTROL

Zero In Wham, used in conjunction with State's complete line of fine insecticides, will provide full season insect control.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Zero in WHAM can only be used in temperatures greater than 50°F. DO NOT use more than one fogger per room. DO NOT use in small, enclosed spaces such as closets, cabinets or under counters or tables. Do not use in a room 5 ft. x 5 ft. or smaller; instead, allow fog to enter from other rooms. Turn off ALL ignition sources such as pilot lights (shut off gas valves), other open flames or running electrical appliances that cycle off and on (i.e., refrigerators, thermostats, etc.). Call your gas utility or management company if you need assistance with your pilot lights.

For use in apartments, boats, closed porches, dormitories, garages, kennels, pet grooming parlors, pet sleeping areas, veterinaries, factories, foodplants, hospitals, hotels, institutions, kitchens, nursing homes, office buildings, restrooms, schools, ships, storage areas, supermarkets, theaters, warehouses and zoos.

Do not use in food/feed areas of food/feed handling establishments, restaurants or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms, but excluding areas where foods may be prepared or held. Commercial food/feed areas where the product cannot be used include areas for receiving, serving, storage (dry, cold, frozen, raw), packaging (cleaning, slicing, cooking, grinding), edible waste storage, enclosed processing systems (mills, dairies, edible oils, syrups).

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling). Not for use in USDA Meat and Poultry Plants.

One 6 ounce aerosol can treats up to 4,000 cubic feet of unobstructed area (a room 20' x 25' with an 8 foot ceiling).

For Fleas and Ticks, use one 6 ounce can for every 1,000 cubic feet of room space.

HOW TO USE:

Step 1: PREPARATION – Open cupboards, cabinets, trunks, and doors to area to be treated to allow maximum kill in all areas where insects can hide and breed. Close outside doors and windows and shut off fans and air conditioning to maximize killing power of fog. Remove pets, birds, and tightly cover or remove fish bowls and aquariums before spraying. Cover waxed wood floors and waxed furniture in the immediate area surrounding the fogger (newspapers may be used). Remove or cover exposed foods, dishes, utensils or food handling equipment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Shut off electrical appliances. Do not place activated fogger in a cabinet or under a counter or table. Do not use fogger in an area less than 100 cubic feet.

Step 2: ACTIVATION OF FOGGER – SHAKE WELL JUST BEFORE USING. Place a section of newspaper on floor in center of room to be treated. NOTE: Do not place fogger on water-stainable surface. Tilt can opening away from face and depress tab firmly with thumb until it clicks in locked position. Aiming spray away from face, set fogger on newspaper, leave room and close door. After activation, leave room or house at once. Keep area closed for 2 hours (30 minutes for flying insects) before airing out. Open all doors and windows and allow to air for 30 minutes. Repeat spraying in two weeks or when necessary.

Please review label and SDS for all product directions, precautions and first aid information.

TECHNICAL DATA

APPEARANCE: ater-based aerosol

ODOR: mild odor

SPRAY CHARACTERISTICS: dry spray

CONTACT KILL: excellent

ACTIVE INGREDIENTS:

Pyrethrins 0.050%
 N-Octyl bicycloheptene dicarboximide 0.380%
 Permethrin [*(3-Phenoxyphenyl)methyl (+ or -)
 cis-trans-3-(2,2-dichloroethyl)2,2
 dimethylcyclopropanecarboxylate) 0.40%

EFFECTIVE AGAINST: Ants, cockroaches, crickets, fleas, flies, mosquitoes, rice weevils, saw-toothed grain beetles, small flying moths and ticks.

REGISTRATION: Environmental Protection Agency EPA Registration Number 1021-1558-70799. This is a general use pesticide.

STABILITY: minimum one year.

AUTHORIZATION: Authorized for use in inedible (non-food) product areas of federally inspected meat and poultry plants.
