Care For Work Environments<sup>®</sup>

# BD-150X™

## PRODUCT OVERVIEW :

### SUPER CONCENTRATED FORMULA

BD-150X's powerful formula contains more than 1.4 billion bacteria CFU/milliliter. Its formula features more than four strains of bacillus bacteria and free enzymes including lipase, amylase, and protease allowing BD-150X to breakdown and digest organic build-up and minimize the environment that attracts drain flies.

### ODOR ELIMINATION

BD-150X utilizes an odor encapsulator to aid in the suppression and neutralization of foul odors. Eliminating these malodors presents a more desirable atmosphere for the employees and guests of your facility.

## DIRECTIONS FOR USE :

**With BioDose Pump:** Install a discrete location and insert the batteries. Attach the connector piece, located on the back of the BD-150X cartridge, to the nozzle of the cartridge. Using the custom key, open the pump and install the cartridge. Place the feed line into the open drain. The pump's default setting will automatically dispense product for 30 days.

**With State Drain Dosing Pump:** Install the pump near application point. Install feed tubing directly into open drain, or tap into drain line and use plastic injection tip. Attach tubing to right side of pump. Shake gallon container. Place tube with strainer into the gallon container and connect to left side of pump. Set programming to run multiple events 24/7 so that the gallon will empty in 90 days. Prime the pump.

## TECHNICAL DATA :

**APPEARANCE:** straw colored liquid

**SCENT:** none

**SHELF LIFE:** two years

**NOTE:** This product is DSL approved for use in Canada.
