## why go Green?

Green cleaning, sanitization and maintenance means using products and procedures that reduce the health and environmental impacts compared to similar conventional products and procedures used for the same purpose. By going green with State, you will be using products and procedures that are SAFE, SUSTAINABLE, EFFECTIVE and CERTIFIED.

### safe

State's green products are safer for users, occupants and visitors. The unique formulas are specifically designed to balance the safest ingredients while maintaining effective performance.

- Neutral pH products are less irritating to skin and eyes
- Minimal to no fragrance reduces chance of irritation
- Safer to handle with reduced inhalation concerns

### sustainable

State's green products are sustainable, meeting the needs of the present, without compromising the ability of the next generations to meet their own needs. By implementing green cleaning, sanitation and maintenance products and procedures, you are taking steps towards a more sustainable future.

- Super concentrated to reduce resources and energy used in shipping; performs equally well in cold water to conserve energy
- Low to no volatile organic compounds reduce the chance of smog formation
- Many products are readily biodegradable by the OECD 301B test method, breaking down into water and carbon dioxide
- Packaged in 100% recyclable bottles and corrugated cardboard boxes
- Surfactant system in many cleaners is derived from natural, renewable ingredients such as sugar, coconut oils, ethanol and lactic acid

## effective

Perhaps most important, State's green products are equally as effective as their counterparts!

- Verified by independent, reputable third-party certifications
- Products must perform as well, if not better, than conventional alternatives

## certified

Safer Choice is a voluntary EPA program that certifies cleaning and other products made with ingredients that are safer for people, pets, and the planet. Safer Choice certification represents a high level of achievement in formulating products that are safer for people and the environment.

Green Seal is an independent, non-profit organization that acknowledges environmentally responsible products and services.

UL EcoLogo is North America's largest, most respected environmental standard and certification mark. UL EcoLogo provides customers - public, corporate and consumer - with assurance that the products and services bearing the logo meet stringent standards of environmental leadership.

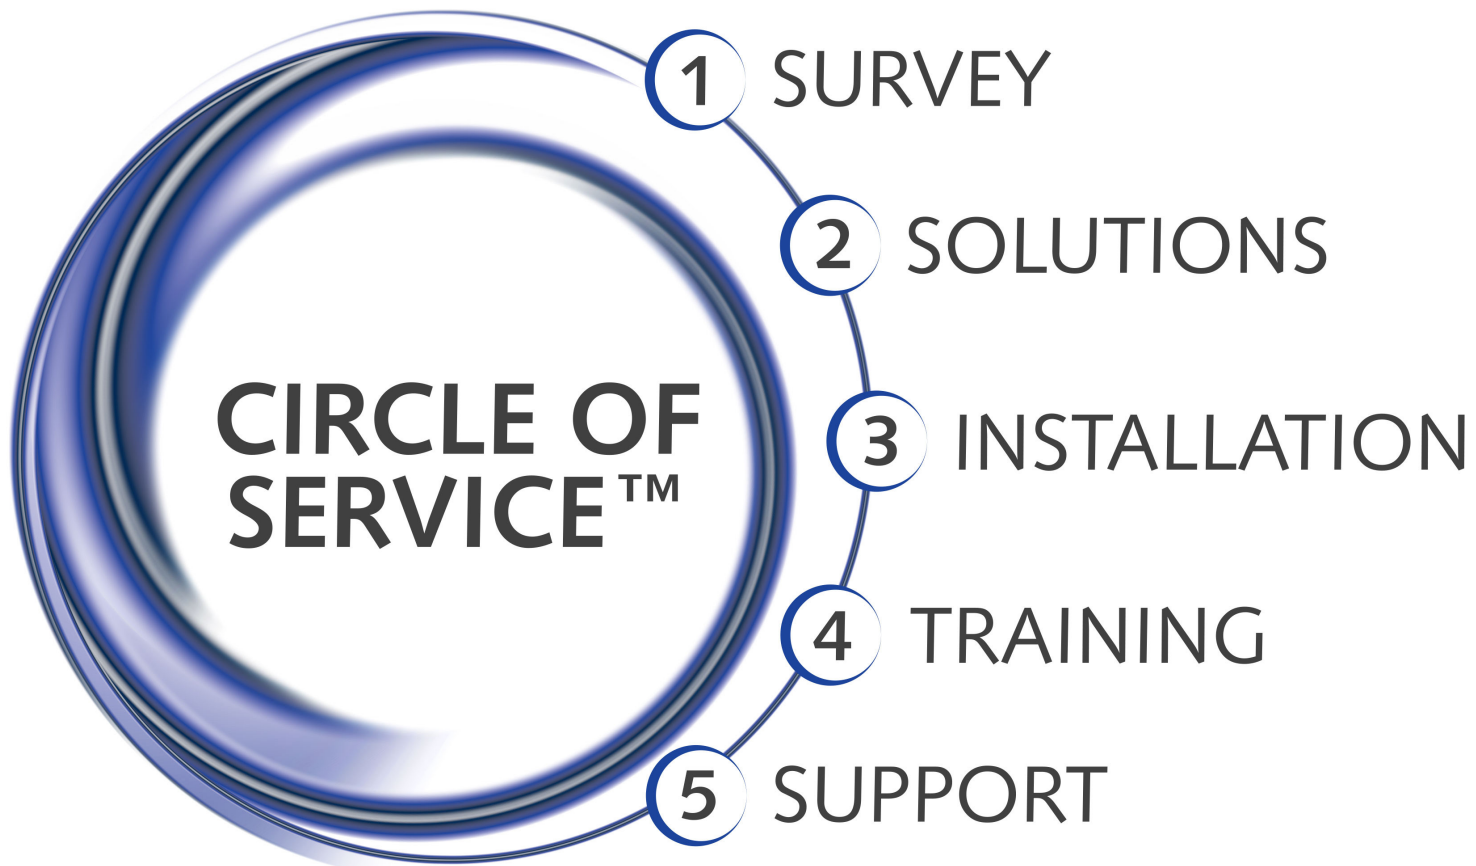

The purpose of the USDA BioPreferred® program is to promote the increased purchase and use of biobased products. The program aims to reduce petroleum consumption, increase the use of renewable resources, better manage the carbon cycle, and reduce adverse environmental and health impacts.

## dilution system

Our concentrated products can be dispensed through the State One Solution™ Dilution System. This system will help you optimize your procedures, resulting in a cost savings for you. Service work from a State Chemical Account Manager is included, and offers inventory management and comprehensive on-site training.
