CARE FOR WORK ENVIRONMENTS®

# Mint Action™

## BOWL & URINAL CLEANER

### UTILISATION FACILE

Squirt control cap permits Mint Action™ to reach the hard-to-get-at areas under bowl rims and urinal lips. It quickly removes water lines, rust stains and encrusted deposits.

### SENTEUR AGRÉABLE DE MENTHE

The mint aroma lasts for hours without the irritating harsh acid fumes common with ordinary cleaners. Surfaces are left deodorized and fresh smelling.

### TECHNOLOGIE DE POINTE

This thickened formula clings while it cleans and continues to work through repeated flushings. Formula is designed for greater safety on the metals in plumbing systems, yet powerful enough to remove tough lime and uric acid salt deposits. Formula contains 35% active ingredients to maximize cleaning time. Mint Action is specially formulated to clean on contact with minimum scrubbing.

When used as directed, Mint Action will not harm iron, copper or steel plumbing systems. However, Mint Action is not to be used on chrome fixtures.

### MODE D'EMPLOI

**POUR LES TOILETTES :** Squirt a small stream of Mint Action over the inside bowl area. Simply spread around the bowl with a swab mop. Mint Action clings to the bowl. Be sure to swab under the rim where scum accumulates. Wipe around the fixture exterior as well.

**POUR LES URINOIRS :** Squirt a small stream (2 oz.) of Mint Action on the inside urinal walls. Spread around the surface with a swab mop. It clings to the walls of the urinal, cleaning as it remains in contact with the surface. Be sure to cover water outlets and grooves along walls. Allow 4 to 5 minutes for Mint Action to work. Then flush.

### DONNÉES TECHNIQUES

**ASPECT :** liquide visqueux, translucide et vert

**ODEUR :** fragrance de menthe

**TYPES D'ACIDES :** organiques et inorganiques

**DENSITÉ :** 1,152
